Documentation

Unified Portal

- Learning portal for the students to learn and improve their learning skills.

- To make them improve their skills and develop their career various tools have been developed.

- Students should be able to complete some stages which will help them to gain knowledge and improve their career.

Stages

- Onboarding

- Profile Gap Analysis

- Profile Mentoring

- Application Stage

- Strategy Session

- Post Admit Services

Used tools for backend

- Intellij
- Postman
- PgaAdmin

Techniques used

- Java
- SpringBoot

Work done for features

- Unified is maintained with both admin and client features.

- Whatsapp notifications for the students have been implemented using backend logics via. Java and SpringBoot.

- Email notifications for each stage had been done to make the admin know about the client's work regarding the updates.

- Files and images for the implementation of features have been stored in s3 bucket and then it was used for the flow using pgAdmin database.

- Admit Selector tool have been implemented to compare any of the schools and choose the best of them to start their career.

- CV Builder tool which helps the students to create a professional resume.

- Recommender Selector tool in which students can study using a recommender guide and upload the document.

- School Research tool which made for students to answer the questions, create a decision matrix, add the school preferences and generate the report of work done in this tool.

- Onboarding stage the students can schedule calls with admin and fill their details.

- Profile Gap Analysis stage the students can schedule pre pga and pga call with admin and pga report can be previewed.

- Profile mentoring stage the students can schedule QPMC 1, QPMC 2 Call and upload the report generated using the school research tool.

- Application stage the students can add the school for their preferences and upload the documents.

- Strategy Session stage the students can schedule Pre Strategy, Strategy Call and upload the documents for frameworks of strategy session substage.

- Post Admit Services stage the students can add universities,upload admit card, cost of expenses report and i20 form for chosen university and also they can schedule the visa interview call.
